**To:** Acevedo, Janie  
**Subject:** air bullet for today

Janie:

The first bullet will be the new one. The highlighted one is what we had yesterday. Feel free to modify and send back to me to put in today's release.

- The EPA plans to conduct air sampling in all of the Northwoods subdivision homes, with residents' permission. XXXXXXXXXX This information will help residents make the decision to return home.
- For 15 consecutive days, data from the air monitors in the Mayflower community have shown levels that are either non-detect or below action levels established by the Arkansas Department of Health. Air quality monitoring is being conducted continuously by the U.S. Environmental Protection Agency and ExxonMobil separately. The Arkansas Department of Health reviews air monitoring data from both the EPA and ExxonMobil and has concluded data results are similar.

Best regards,

Kim Jordan
